

Do you comply with REACH?

Companies making, using, selling or importing chemicals into the EU need to follow REACH (Registration, Evaluation, Authorisation and restriction of Chemicals) regulations. Through our tailored REACH compliance assessments, TSG Consulting will help your company ensure that it complies with REACH.

Your operation ↪

We will help determine your level of REACH readiness.

- Includes support with preparation for an inspection by the authorities
- We will evaluate your operation's compliance with REACH regulatory obligations against tailored criteria
- We will assess your REACH supporting documentation to ensure that you are following the processes and procedures required for compliance
- We will provide a REACH performance report (both to you and other supply chain partners if required)

With a successful assessment of your REACH documentation, processes and procedures you can continually improve your performance and effectively demonstrate that you are REACH compliant. The benefit also extends to your customers and clients, who can be assured that you comply with REACH requirements.

Your suppliers ↪

We will help determine your suppliers' levels of REACH readiness.

- We will evaluate their compliance with REACH regulatory obligations against tailored criteria
- We will assess your suppliers' REACH supporting documentation and supply chain communication to ensure that they are following the desired processes and procedures for compliance
- We will provide a REACH performance report with an overview of your suppliers' REACH compliance

Our assessment solutions will help ensure that the desired processes and procedures for REACH compliance are being followed in your supply chain.

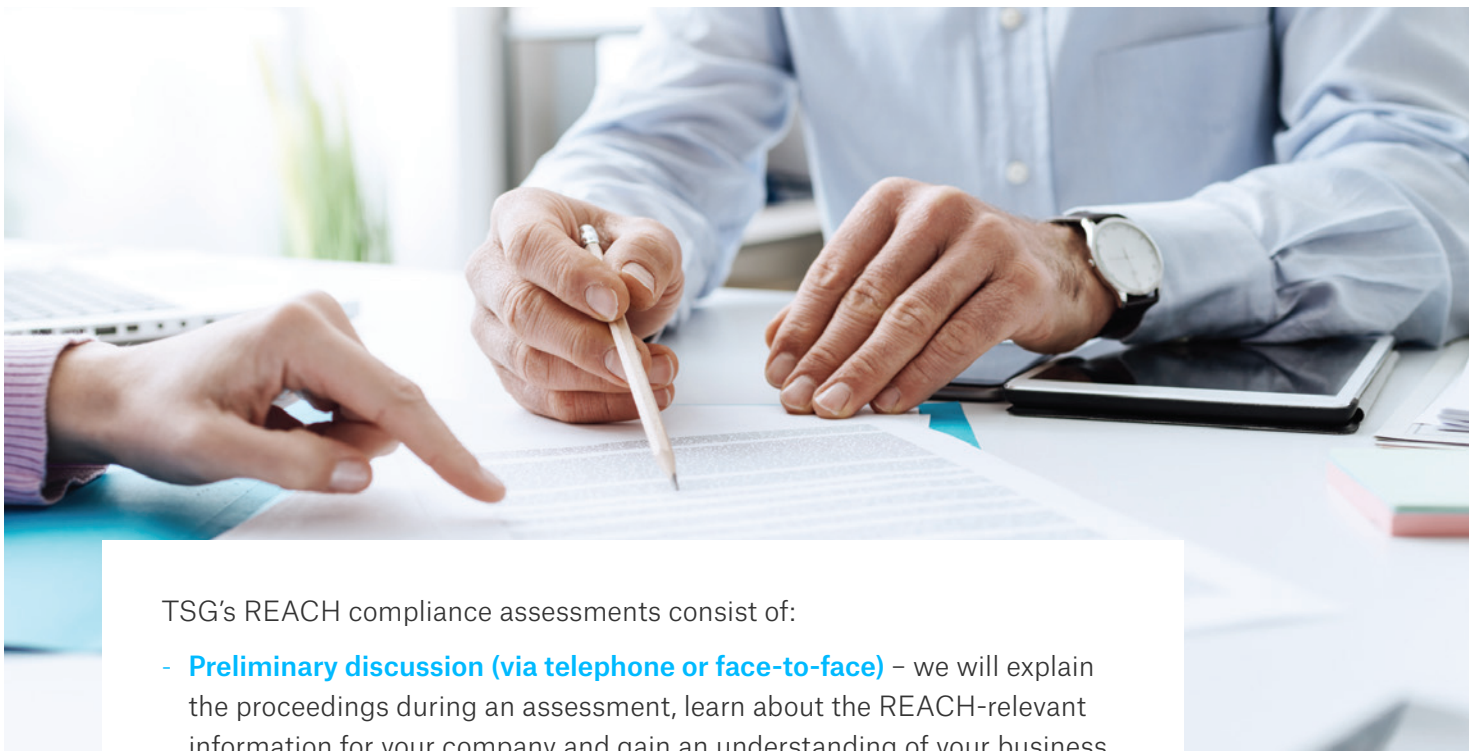

Your Only Representative ↪

If you are working with an Only Representative (OR), you may wish to check their compliance performance.

- We will evaluate the OR's compliance with REACH (especially Article 8)
- We will supply you with a report about your OR's compliance with REACH

Should your OR have failed to fulfil its obligations or hasn't acted to your satisfaction, we can help you change your OR if desired. As a non-EU company you have to the right to change your OR and nominate a new one. TSG offers a comprehensive OR service.

TSG's REACH compliance assessments consist of:

- **Preliminary discussion (via telephone or face-to-face)** – we will explain the proceedings during an assessment, learn about the REACH-relevant information for your company and gain an understanding of your business.
- **Actual regulatory compliance assessment (in-house or desktop/remotely)** – during the assessment we will check and verify your system of implementing REACH by a spot check of selected items.
- **Review** – directly after the assessment we will discuss the results with you and inform you whether there is an immediate need for action or for additional information to be supplied.
- **Assessment report** – You will receive an assessment report from us, which we can discuss in further detail if required, along with verifying any follow-up actions that might have been identified during the assessment.

TSG Consulting will work with you in a neutral and independent manner. Undertaking assessments on site or remotely, we will tailor them to your particular needs as well as to the specific regulatory requirements of the industry sector that you are operating in.

Proactively lower your regulatory risk and increase your market position by appointing TSG as your trusted REACH assessor.

About TSG

For almost 30 years, TSG Consulting has provided companies around the world with regulatory guidance and scientific expertise. Our experts are highly knowledgeable in the core sciences and the public policy decisions that are used to structure and implement environmental and chemical regulations. By combining this knowledge with our industry experience, we provide companies with comprehensive services from the early stages of product development to marketplace entry and ongoing compliance.
