

Biopesticides – Regulatory affairs

An increase in sustainable agriculture and greener solutions to crop protection are helping drive an increase in the European biopesticide market. All biopesticide products and active substances placed onto the market within the EU are regulated, along with more traditional chemical products, under Regulation (EC) No. 1107/2009.

How TSG can help ↪

Our multidisciplinary team of specialists, with experience in the field of biopesticide regulatory affairs, has a track record of success contributing to our growing consulting business. We provide support and advice to assist our clients to defend existing and obtain new approvals for active substances. We also guide clients through the process of obtaining new authorisations for plant protection products, and supporting existing products.

We provide support for:

- ↪ Microbial pest control agents
- ↪ Plant extracts and other biochemicals
- ↪ Pheromones and semiochemicals

Our services include ↪

- Strategic advice and guidance
- Dossier preparation and submission
- Task force management
- Preparation of product labels
- Preparation of expert reports/waivers
- Study design and monitoring
- Training
- Data Gap Analysis (completeness checks)
- Liaison with regulatory authorities
- Preparation of Biological Assessment Dossiers
- Preparation of Safety Data Sheet (SDSs)
- Human health and environmental risk assessment

Our consultants are actively involved in industry groups nationally and internationally and work with colleagues in industry to support a rational and sound scientific basis to the approval of biopesticide products. In addition to understanding the regulatory processes, our scientists have expertise in microbiology, residues risk assessment, environmental fate and behaviour, mammalian toxicology, and ecotoxicology. We believe in the value of proactive project management to control cost, manage deadlines and communicate with our clients in a professional and timely manner.

About TSG

For almost 30 years, TSG Consulting has provided companies around the world with regulatory guidance and scientific expertise. Our experts are highly knowledgeable in the core sciences and the public policy decisions that are used to structure and implement environmental and chemical regulations. By combining this knowledge with our industry experience, we provide companies with comprehensive services from the early stages of product development to marketplace entry and ongoing compliance.
